Body Tightening

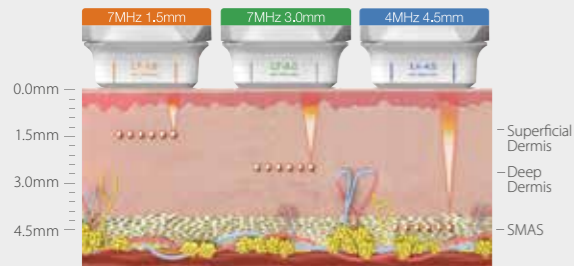

Macro-focused ultrasound treats body with optimal speed, comfort and efficacy for SMAS contraction, collagen stimulation, and subcutaneous fat reduction.

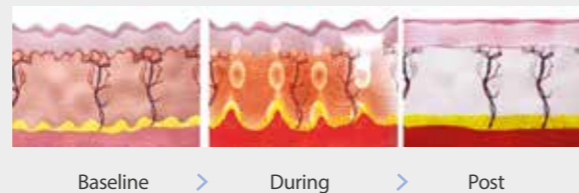

6mm and 9mm are utilised to contour the body.

Triple Layer Treatment

Hyperthermia Lifting Therapy

Frequently Asked Questions

What is Ultraformer III good for?

Ultraformer treatment is good for skin lifting and tightening. It also helps with fine lines, wrinkles, pores, skin tone, and laxity.

Can I receive botox and filler in addition to the HIFU Treatment?

Yes, however HIFU would need to be performed a month in advance to any injectables. HIFU should not be treated directly over fillers.

Is the treatment painful?

It depends on the pain sensitivity level of each individual. However, Ultraformer is applicable without anaesthesia in a high percentage of cases - in fact, many patients report no pain with treatment.

How long does the treatment take?

Ultraformer III's fast shooting speed means full face treatment takes only 15-20 minutes. This is only possible with Ultraformer III.

Will I need to take time off work for recovery?

No, you can go back to work and normal life immediately after the treatment.

When will I start to see results?

Ultraformer III gives immediate results, though ideal results can come 60 days after treatment. Collagen regeneration generally takes 30 to 90 days.

Which parts of the body can the Ultraformer III treat?

The Ultraformer III is applicable to treat any part of the skin and body - for example, the face, neck, abdomen, buttocks, upper arms and knees. The practitioner can select a cartridge varying on the thickness of the area in focus.

Global Opinion Leaders' testimonials on Ultraformer

I was impressed by the skin lifting result after experiencing Ultraformer for the first time. It shows significant scientific improvement giving great results using HIFU. I believe Classys will be one of the global leading companies based on its outstanding technology.

Dr. Benjamin Ascher, MD, Plastic Surgeon 🇫🇷

Ultraformer's skin tightening effects are amazing. I used to use medical laser products when I didn't know HIFU products. Laser has its own limitations in terms of clinical results and side effects.

Dr. Franco Lauro, MD, Plastic Surgeon 🇮🇹

I've been using Ultraformer for more than a year and very satisfied by its clinical results. I believe Ultraformer is a game-changer for skin lifting. I'm very proud that I'm one of the heaviest users of Ultraformer in the world.

Dr. Jean Louis Sebagh, MD, Plastic Surgeon 🇬🇧

Ultraformer brings immediate tightening effects with 3 different cartridges, specially targeting the SMAS layer which is located 4.5mm inside of the dermis. Plastic surgery was the only option for skin lifting but now we have equivalent results via Ultraformer as non-surgical treatment.

Dr. Klaus Friz, MD, Plastic Surgeon 🇩🇪

Ultraformer provides pain-free and superior skin tightening results after treatment. It wouldn't be easy to me to start HIFU treatment without Ultraformer, because Japanese patients are extremely sensitive towards pain. I appreciate Classys for making such outstanding equipment for physicians.

Dr. Nobuhiro Suetake, MD, Plastic Surgeon 🇯🇵
