We also stock Revitalash, the Clarisonic Brush, & Lustre Pure Light.

Dr teri johnson

Dr Teresa (Teri) Johnson Is a local General Practitioner in Middlewich where she has been a partner at The Oaklands Medical Centre since April 2000.

Teri qualified to be a doctor in 1993 after graduating from Liverpool University with an MBCHB and has since worked and trained in the North West, obtaining her Vocational Training Certificate for General Practice in 1999. She has worked as a GP in Cheshire ever since.

She is a member of the GMC and the British College of Aesthetic Medicine (BCAM) BCAM carried out her initial training and she was then assessed by them and certified a full member.

Why not arrange a consultation where Dr Johnson can recommend the most appropriate treatments to meet your requirements.

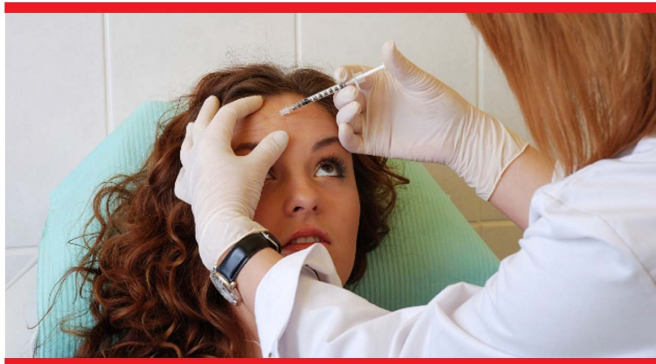

Dr Johnson stocks a variety of skincare products which she has specially selected to suit most skin problems. We stock Neostrata, Dermaquest, Skinceuticals, Jan Marini, Agera, and Medik8 to name a few.

Dr Johnson performs the stronger peels to reduce the appearance of ageing and sun damage but have a they have a significant down time due to the peeling effect.

dermal fillers

Want to give yourself a younger fresher look without the risks of surgery?

We stock an extensive range of dermal fillers such as Restylane, Juvederm ultra, Teosyal, Radiesse and Belotero. We are able to smooth out lines, wrinkles and folds, add definition to the lips and cheeks and contour the face. Smokers lines can be reduced to prevent lipstick bleeding, we can lift brows slightly, and reduce the jowl appearance of the chin. Fillers can also be used to correct nose imperfections. All our products are slowly broken down by the body and are of low risk. Depending on the products selected a visit 1 to 2 times a year is needed to maintain your results.

sculptra

Sculptra is an injectable facial treatment that gives you deep tissue regeneration to help reduce the signs of ageing in your face. Unlike traditional dermal fillers, Sculptra works to replace lost collagen and replenish volume in your face more subtly over time, giving you a more natural looking appearance.

An average of 3 injection sessions are needed with an interval of 2 - 4 months between each session depending on your requirements. Sculptra stimulates the growth of your own collagen hence the results look natural. Over time, you'll notice changes to your face that can last for 2 years

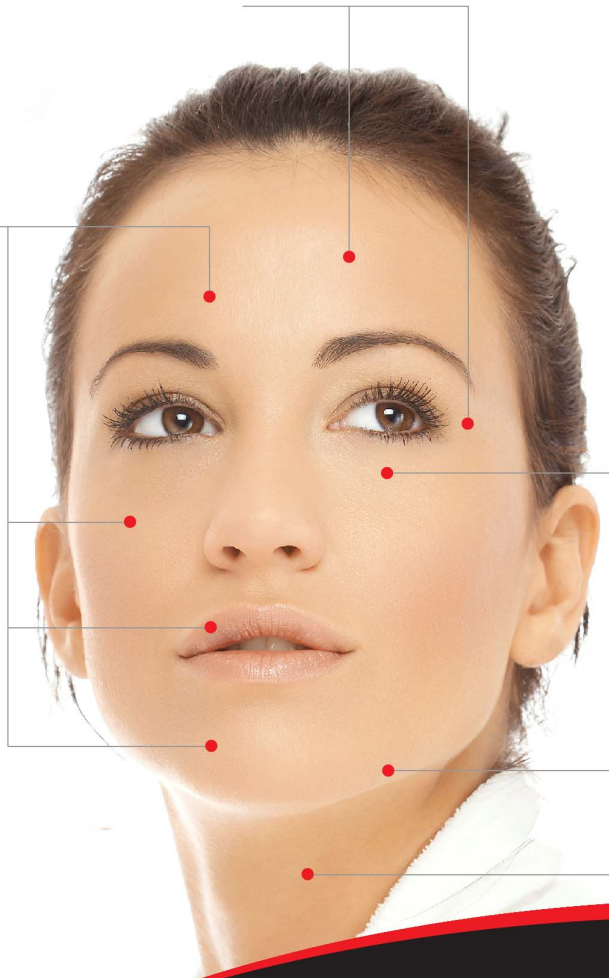

minor surgery

Dr Johnson can also perform some minor surgical treatments such as wart, milia, spider naevi, and skin tag removal. For more information call 07858 118117.

relaxing wrinkles

Our most popular treatment with men and women.

Used mostly to **reduce frown and forehead lines** and to **soften crows feet**. Within 2 weeks of this simple treatment your lines will soften leaving your face looking fresher, youthful and often less stressed. We aim to maintain some facial expression but treatments are tailored to suit the individual's needs.

skinboosters

Skinboosters are designed to restore hydration in the skin and improve the skin's quality and condition. They are based on a hyaluronic acid gel closely resembling your body's own collagen. A series of tiny injections, made more comfortable with an anaesthetic called lidocaine, are given resulting in improved skin tone and skin elasticity. Skinbooster treatments hydrate the skin and are perfect for treating the face, hands, neck, décolletage and lips where over exposure to the sun can cause premature ageing. Visible long lasting improvements to the skin can be seen after a course of 3 to 4 treatments.
