

WHAT OUR CLIENTS SAY ABOUT **THERMACLINIC**

"I have been having ThermoClinic treatments regularly for a number of years now and I have found the treatments give a lifting and firming effect on my face and neck. I especially like this treatment as it is comfortable and pleasant and does not irritate my sensitive skin in any way. The treatments are good value for money when compared with other anti-aging treatments. I would definitely recommend ThermoClinic at Cheshire Lasers, to help improve skin elasticity and maintain firmness."

"I have recently started a course of ThermoClinic treatments. I was very nervous at first, but I have really enjoyed how relaxing the treatments are. I am so excited to see the end result as even after a few treatments my skin looks and feels much healthier. Quite a few people have said how well I look. I would definitely recommend ThermoClinic to people who want to look better but are nervous about having more invasive treatments."

"I have been having ThermoClinic at Cheshire Lasers for several years now and after the initial course of 6 treatments, I saw an improvement in my skin and softening of the lines on my forehead, eye and upper lip. I continued to have maintenance treatments every 6 to 8 weeks and over time my wrinkles were zapped away and have not come back. My friends seem to be more wrinkled each year, but I have hardly aged at all thanks to ThermoClinic."

THERMACLINIC

ThermoClinic offers an effective and comfortable way to achieve facial skin tightening and wrinkle reduction. With ThermoClinic you can enjoy tighter, younger looking skin with improved tone, texture and elasticity.

THERMACLINIC

THE RESULTS SPEAK FOR THEMSELVES

How does ThermaClinic Work? A form of energy called Radiofrequency (RF) is applied to the skin to gently heat the skin. This heating promotes accelerated collagen production and contraction of collagen fibres to restructure and tighten the skin.

Is the treatment effective? Yes – the system has been designed by dermatologists and proven to be highly effective for thousands of people.

How many treatments are necessary? A course of 6 to 8 treatments are recommended every 2 weeks intervals.

Am I suitable for ThermaClinic? ThermaClinic is suitable for most individuals. However, if you are pregnant or breast feeding, the treatment is not advisable. It is also not recommended if you have metal plates in your face near the treatment area. (fillings are fine). Prior to treatment you must see one of our therapists for a consultation so we can confirm your suitability for treatment.

How is ThermaClinic carried out? A thin layer of gel is applied to the face and a handpiece delivering RF current is moved in circular motions to warm the skin. The desired skin temperature is reached quickly and then maintained for 2 to 3 minutes. Typically, each treatment lasts 20 to 60 minutes, depending on the size of the area treated. The gel is then

removed and skin care products are applied according to your skin type.

How does ThermaClinic feel? The treatment is not considered painful. Due to the unique, multi frequency technology of ThermaClinic most people comment on how pleasurable and relaxing the heating sensation is.

What should I expect after treatment? Your skin may be pink for a short time after treatment, but this will subside quickly. You can return to normal activities immediately and no special after care is required. Following the treatment, the contraction of collagen fibres improves skin elasticity and the skin may appear firmer. However, results are progressive and the full effect is generally seen 1 to 2 months after a course of treatments.

Are there any side effects? Side effects are extremely rare, but can include slight, short term discomfort, which is easily tolerated. Slight swelling and redness can occur, but will disappear within a few hours. Very occasionally a red inflamed patch may occur where a small area of skin has heated up too much during treatment, these patches tend to settle after a few days.

"Thermaclinic is one of our most popular non-surgical, skin rejuvenation treatments. My clients have said that the treatment is comfortable and relaxing. Many of them notice an improvement after only a few treatments. After a course of treatments most people benefit from firmer, brighter and more radiant skin. Fine lines and wrinkles reduce especially those around the eye area which respond very well to treatment!"
